

Aftermath of the Miller Homestead Fire, September, 2012

**Rangeland Management in a Dynamic Climate
October 28, 2019
6 – 9 PM, at the Central Hotel, Burns, Oregon**

On Monday, October 28, the Eastern Oregon Agricultural Research Center will team up with the Upper Snake River Tribes Foundation for an evening of interactive discussion on rangeland management challenges in a dynamic climate. The event will feature presentations from scientists with the Agricultural Research Service and Oregon State University. Presentations will explore how historical and current variability in weather and climate influence a variety of rangeland management issues including restoration, juniper management, wildfire, and grazing. Come and join us for an evening of learning and discussion at the Central Hotel on October 28th from 6 to 9 PM. Snacks and refreshments will be provided.

Presentations:

A Brief Trip Through Time: Short and Long Term Climate Cycles - Tony Svejcar (OSU)

Fire and Fuels Management in a Dynamic Climate - Kirk Davies (USDA-ARS)

Juniper and Climate Interactions - Jon Bates (USDA-ARS)

Restoration Challenges and Weather Variability - Stella Copeland (USDA-ARS)

Grazing Management in a Dynamic Climate - David Bohnert (OSU) & Dustin Johnson (OSU)

*This project was funded by the USDA Climate Hub and managed by the Upper Snake River Tribes.
