## Climate Conversation: Climate Informed Agriculture

USDA

United States Department of Agriculture Southwest Climate Hub

#### Today's Conversation

- Climate
  - Terminology
  - U.S. Climate trends
  - Why these changes are occurring
  - Local Climate Information
- Climate Smart Agriculture
  - Available Resources
  - How to start the conversation
- Discussion

In a recent survey 63% of NRCS staff surveyed agreed that they would like climate or weather forecasts to inform client decisions. Source Wiener et al. 2020 in JSWC 75:62-74

## Terminology

#### Weather vs. Climate (Source: NOAA)

Weather reflects short-term conditions of the atmosphere

Climate is the average daily weather for an extended period at a certain location

Weather can change from minute-to-minute, hour-tohour, day-to-day, and season-to-season. **Climate**, is the average of **weather** over time and space.

Climate is what you expect, weather is what you get.

Photo Credit: Travi

## Climate Smart Agriculture

#### Definition:

Agriculture that sustainably increases productivity, resilience (adaptation), reduces/removes GHGs (mitigation), <u>and</u> enhances achievement of national food security and development goals. (Source: Food and Agriculture Organization)

#### Other terms:

- Climate Informed Agriculture
- Climate Smart Farming
- Natural Climate Solutions
- Engineering with Nature
- Weather/Drought Resiliency

Natural Resources Conservation Service nrcs.usda.gov

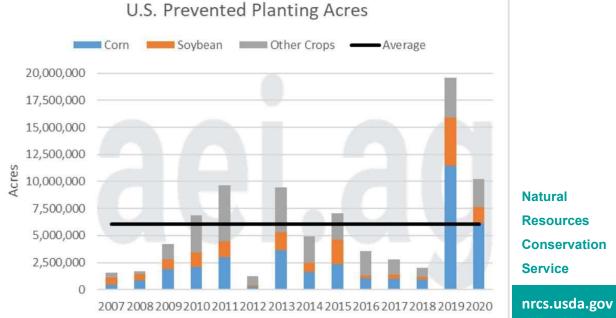

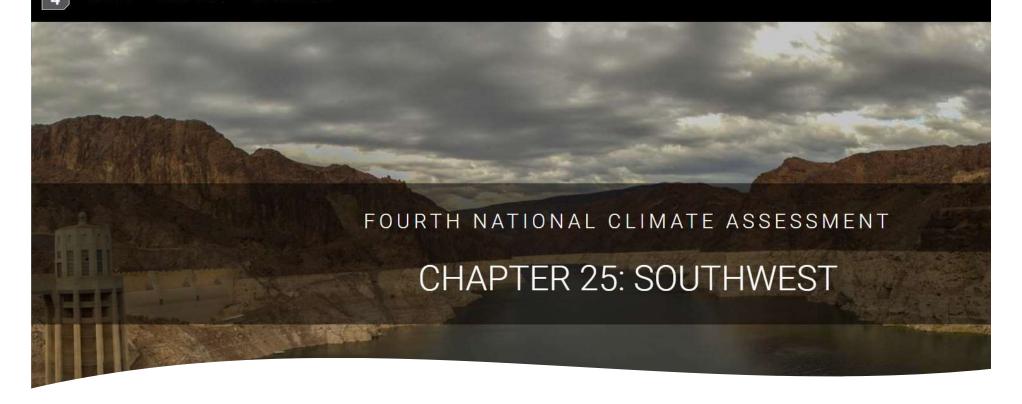

#### What changes in weather OOOOOOO( have you noticed in your lifetime?

Fourth National Climate Assessment 2018

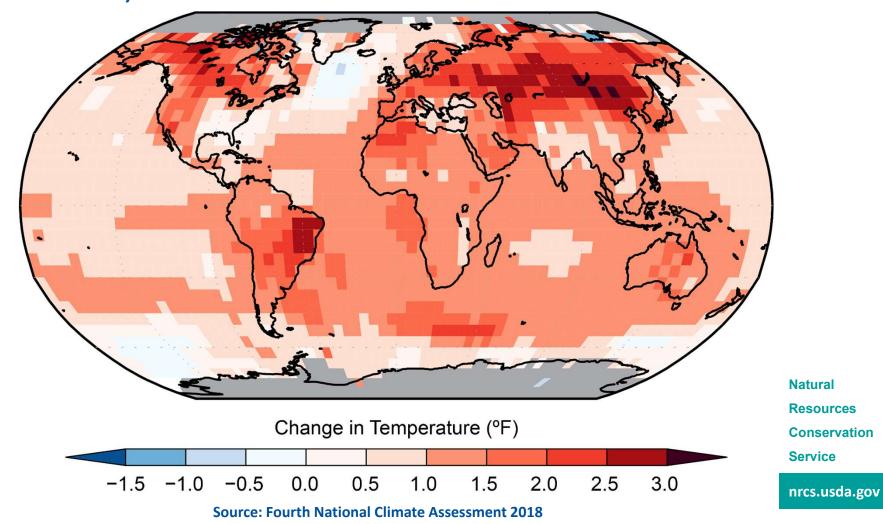

- 1,500 page congressionally mandated report done every four years by the US Global Change Research Program (federally funded).
- Lead agency: National Oceanic and Atmospheric Association (NOAA), many other partner contributors including USDA
- Official data source for USDA climate change information
- Natural Resources Conservation Service

## Why Are These Changes Happening?

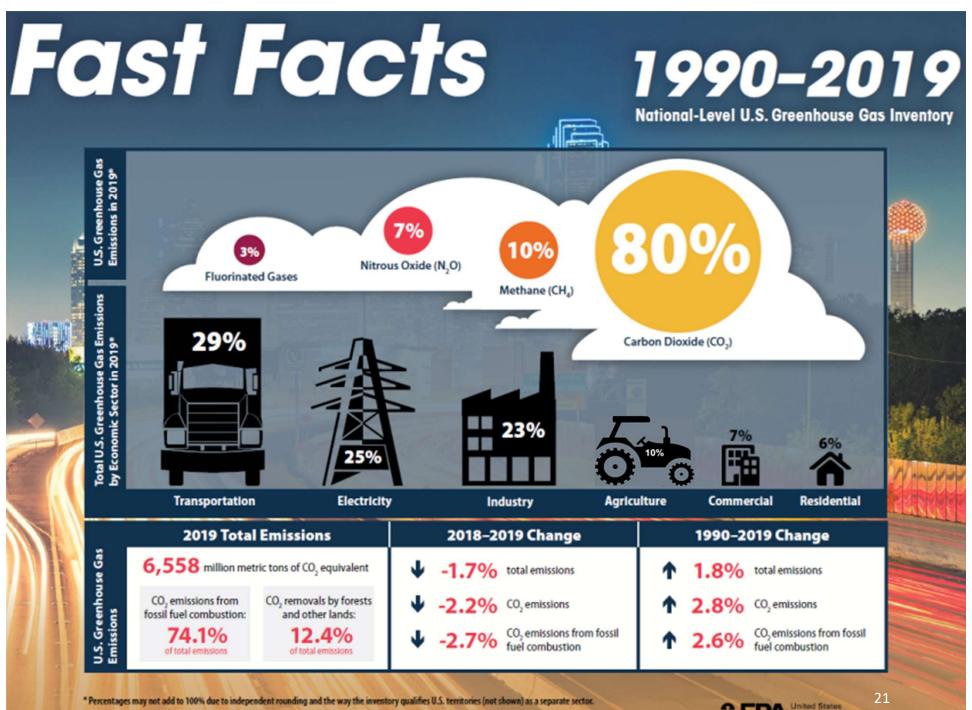

United States Department of Agriculture Southwest Climate Hub

#### The Greenhouse Effect

Some sunlight that hits the earth is reflected. Some becomes heat.

CO<sub>2</sub> and other gases in the atmosphere trap heat, keeping the earth warm.

ATMO;

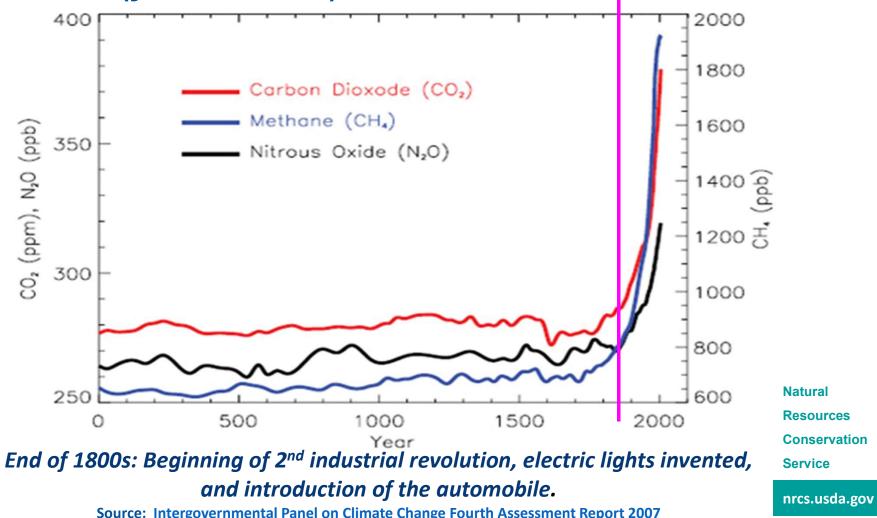

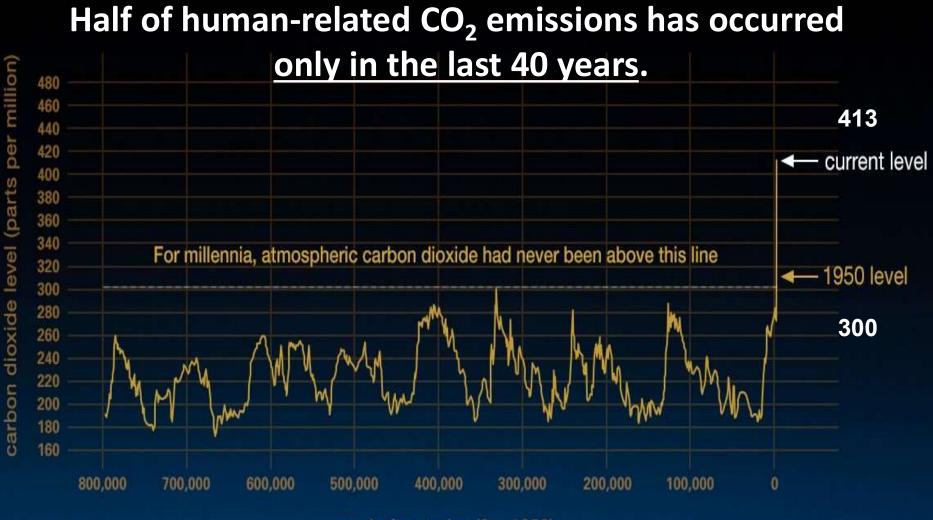

Emissions from Land-Use, Land-Use Change and Forestry are reported separately and not shown in the figure.

### Local Climate Changes and Trends

Natural Resources Conservation Service

nrcs.usda.gov/

## Southwest Things to Think About 000

- Mega Drought
- Water Scarcity
  - Ground
  - Surface
- Native Americans are among the most at risk from climate change.
- The last decade has been the warmest on record for New Mexico, with increasing trends in both extremely hot days and warm nights.

Natural Resources Conservation Service

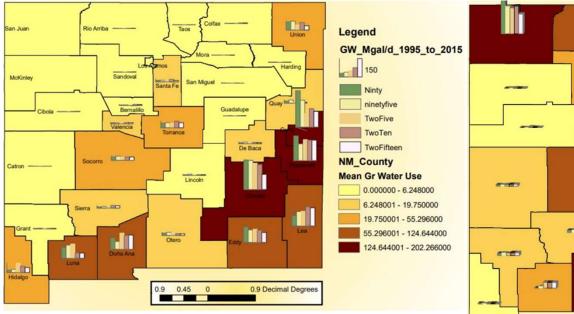

nrcs.usda.gov

ISDA

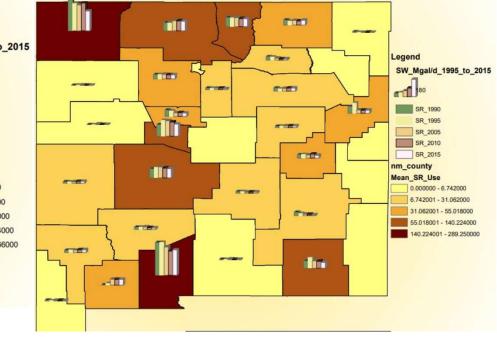

## What has changed in New Mexico?) ()

- Increased number of extremely hot (>100 F days)
- Average rainfall has decreased 10% since 1895.
- Water Scarcity persists

Ground Water Use vs.

#### Surface Water

#### Where to Start the Conversation About Climate Informed Agriculture

- Understand the Climate Information for your area:
  - NOAA State Summaries
    <u>https://statesummaries.ncics.org/</u>
  - Weather Explorer to see a county level view of historic and projections: <u>https://crt-climate-</u> <u>explorer.nemac.org/</u>
  - US Drought Monitor and other resources: <u>www.drought.gov</u>
  - USDA Climate Hubs: <u>https://www.climatehubs.usda.gov/</u> <u>hubs/southwest</u>

#### Where to Start the Conversation About Climate Informed Agriculture

- NRCS professionals know the Landscape and Operation Vulnerabilities
  - Lowlands
  - Steep slopes
  - Poor soils
  - Overgrazing
- Will current practices be sufficient to address the extremes and changes in a changing climate?
- Think through specific crops/operations you are familiar with to see what else can be done to adapt?

#### **Non-Discrimination Statement**

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.
