CALL FOR
WORKSHOP
PROPOSALS

smoke

SYMPOSIUM

RALEIGH, NORTH CAROLINA AND UNIVERSITY OF CALIFORNIA, DAVIS, USA

Workshop: A brief and intensive educational program for a small group of people that focuses on techniques and skills in a particular field.

The workshops will take place on Monday, April 20, the day preceding the 3rd International Smoke Symposium (ISS3).

The purpose of the workshops is to provide a forum for researchers and practitioners in wildland fire, smoke management, public health, and air quality management to discuss and exchange interests on defined topics. We view these workshops as an opportunity for knowledge and technology transfer.

There will be a nominal registration fee for participants to cover the cost of the meeting rooms, refreshments, and audio-visual equipment. Instructors are not required to pay this fee.

Proposals should include the following information:

- Title of the workshop
- Name of the sponsoring organization, if applicable
- Names, affiliations, and email addresses of the workshop instructors
- Short bios (100 words) of the workshop instructors, including a description of their qualifications relative to the topic area
- Proposed length of the workshop: half-day or full day
- A brief, one paragraph description of the workshop
- A statement of the workshop's objectives/goals
- The maximum number of participants (if any)
- Any special facility needs (e.g. LCD Projector, room set-up, internet connection, etc.)

Workshops with less than the minimum registration may be cancelled at the discretion of the conference organizers.

Workshop proposals will be evaluated based on their overall quality and fit with respect to the ISS3 program. For example, workshops of interest would cover topics such as interpreting data from recent measurement campaigns; demonstrating new tools for remote sensing/ forecasting of fires and smoke; studying the health effects of smoke using cohort rather than cross-sectional designs; and communicating about fire and smoke events via media and social media. Other topics are also welcome.

SUBMIT YOUR PROPOSAL ONLINE:

www.iawfonline.org/event/3rd-international-smoke-symposium

The deadline for submissions is November 25, 2019.

Notifications of accepted workshops will be announced by December 6, 2019.
